OBJECTIVE

”Motivated and dedicated Computer Science student seeking a Software Development Internship to gain hands-on experience and contribute to innovative projects. Eager to apply my coding skills, problem-solving abilities, and passion for technology to support the organization’s growth and success.”

EDUCATION

Rajiv Gandhi University of Knowledge Technologies

2021 – Present

B.Tech - Computer Science and Engineering - CGPA - 8.7

Rajiv Gandhi University of Knowledge Technologies

2019 – 2021

Pre University Course - CGPA - 9.6

ZP High School

2014 – 2019

SSC - CGPA - 10.0

COURSEWORK / SKILLS

- | | | | |
|--------------------------------|-------------|---------------|--------------|
| • Data Structures & Algorithms | • Core Java | • Java Script | • Node.js |
| • OOPS Concept | • CSS | • SQL | • Express.js |
| | • Html | • React.js | • MongoDB |

PROJECTS

🔗 | FOOD DELIVERY APPLICATION USING MERN STACK

Oct 2024 - Nov 2024

- React, Node.js, Express, MongoDB
 - * Developed a full-stack food delivery application, allowing users to browse menus, place orders, and track deliveries seamlessly .
 - * Designed a responsive frontend using React.js, ensuring a user-friendly interface and optimized navigation.
 - * Implemented a secure backend with Node.js and Express.js, integrating MongoDB for efficient storage and management of orders, menus, and user information. Added features such as user authentication, order history, and real-time updates using JWT and RESTful APIs.

🔗 | TASK MANAGER WITH USER AUTHENTICATION

Aug 2024 - Sep 2024

- * React, Node.js, Express, MongoDB
 - * Developed a web-based task management application that lets users create, update, and delete tasks securely.
 - * Implemented user registration and login using JWT (JSON Web Tokens) to manage user sessions safely .
 - * Designed the frontend with React, creating a responsive and easy-to-use interface for managing tasks.
 - * Integrated a backend using Node.js and Express, connecting to a MongoDB database for storing tasks and user information.

🔗 | SWIGGY CLONE - ONLINE MEAL PLATFORM

June 2024 - July 2024

- * React, Node.js, Express, MongoDB
 - * Developed a full-stack food delivery application replicating Swiggy’s core functionalities, enabling users to explore restaurants, browse menus, add items to cart, and place orders. .
 - * Designed a responsive and intuitive frontend using React.js, ensuring a seamless user experience across devices..
 - * Implemented a robust backend with Node.js and Express.js, integrating MongoDB for efficient data storage and management of users, restaurants, menus, and orders..

TECHNICAL SKILLS

Languages: Java,SQL, HTML, CSS, JavaScript, React, Node.js

Developer Tools: IntelliJ IDE, MongoDB Atlas UI , VS Code, Postman , Github

Design Tools: Canva,Powerpoint

CERTIFICATIONS

- SQL Intermediate - HackerRank
- Web Development - TechnoHacksEduTech
- Machine Learning With Python - IBM
- AI for Everyone - IBM
- Cloud Computing - IBM

Key Courses Undertaken

Mathematics and Statistics

Calculus, Probability, Basics of Statistics, Data Preprocessing for Regression Analysis, Regression Models, Classification Models, Support Vector Machines, Ensemble Techniques, Data analysis Tools

Computer Science

Structured Programming Approach, Java, C, Data Structures and Algorithms, Operating Systems, Computer Networks

EXTRA CURRICULAR

* Conducted Some Technical Events like Coding challenges in Technical fest of CSE Dept.
